# PUNCH CHISEL SET

60CrV CHROME VANADIUM

TradeQuip "Made for the Trade" chisels and punches are made from hardened 60Cr-V chrome vanadium steel and feature laquered hexagonal shafts with precision machined punch and chisel tips. Made of high-quality crv chrome vanadium steel that is forged, quenched and tempered for strength and toughness, the hex shaped gold laquered shanks prevent rolling of the bench. Punch and Chisel Kit Pin punches are used for driving out and removing loosened pins after initial movement by a solid punch.

#### FEATURES

- Manufactured from hardened chrome vanadium steel
- Forged, quenched and tempered
- Chisel blades are lacquered to protect against corrosion
- Shanks dip coated in gold lacquer
