TRANSMISSION LIFTER PASSENGER VEHICLES

This TQ Pro "Latest Applied Technologies" 2-Stage Hydraulic Telescopic Transmission Lifter offers a wide range of versatility designed to help increase workshop productivity.

For use with passenger car transmissions, the universal mounting cradle provides a wide four way tilt range and the wide base is enhanced by four premium nylon swivel castors for safer maneuvering around the workshop. The convenient rapid lift without load and slow descent with load is controlled via the foot operated pump and release valve to keep the mechanic's hands free during use. The height and cradle adjustability of this telescopic Transmission Lifter makes it great for any transmission installation or removal.

The sturdy and stable design features four premium nylon swivel castors for easy maneuverability around the workshop.
